

Biography of Bin Ren

Prof. Bin Ren obtained his bachelor (1992) and PhD (1998) degrees in Department of Chemistry, Xiamen University. He started his academic career at the same university as assistant (1998), associate (2000) and full professor (2004). He has been an Alexander von Humboldt fellow in Fritz-Haber Institute (2002-2003). He was awarded Changjiang Chair Professor by the Ministry of Education of China in 2016 and Distinguished Young Scholar Fund by National Science Foundation of China (NSFC) in 2008. He was given Electrochemistry Award of 2022 by the Division of Analytical Chemistry of ACS. He is now the principal investigator of Innovation Research Group Fund of NSFC and an associate editor of Analytical Chemistry (ACS). His research is focused on the development of Raman-based methodology and instrumentation for studying electrochemical systems with high time and spatial resolution. He is the author of over 300 papers, with h-index of 83 and total citation of over 30000 (Google Scholar).

Statement

I am now the vice Chair of Chinese Electrochemical Society in charge of international affairs and fundamental electrochemistry education. I have been the Chair of Electrochemistry Summer School of Xiamen University since 2018. The summer school significantly promotes the fundamental education of electrochemistry in China. We have attracted over 600,000 total number of attendees for the online summer school run in 2020. If I have the chance to be the division officer, I will not only push the education of electrochemistry in China as well as the Chinese communities around the world, but also promote the worldwide electrochemical education, especially in developing countries, with the help of the expertise in the developed countries. I have been the co-organizer of symposia ran by Division 7 in 2019 and 2020 and will be co-organizer in 2023, I will continue to be devoted to the development influential Division 7 of Physical Electrochemistry.
